AI-Powered KPI Interpreter

Business Performance Analysis Report

Performance Analysis Report: Technology Category (West Region)

1. Applied Filters

• Category: Technology

• Region: West

• Start Date: February 14, 2023

• End Date: December 29, 2026

2. Overall Filtered Business Performance

The filtered dataset reflects the following core key performance indicators (KPIs) for the designated scope and timeframe:

• Total Sales: $252,766.99

• Total Profit: $44,412.34

• Total Orders: 498

• Profit Margin: 17.57%

• Total Quantity Sold: 2,350 units

• Average Discount Percentage: 13.34%

3. Category-wise Performance

Because the dataset is filtered strictly to a single category, the performance aligns entirely with the overall totals:

• Technology:

• Total Sales: $252,766.99

• Total Profit: $44,412.34

• Profit Margin: 17.57%

4. Subcategory-wise Performance

Performance across the four subcategories within Technology is summarized below, ranked by total profit:

1. Copiers

• Total Sales: $49,749.24

• Total Profit: $19,327.24

• Profit Margin: 38.85%

2. Accessories

• Total Sales: $61,114.12

• Total Profit: $16,484.60

• Profit Margin: 26.97%

3. Phones

• Total Sales: $98,773.11

• Total Profit: $9,142.21

• Profit Margin: 9.26%

4. Machines (Loss-Making Subcategory)

• Total Sales: $43,130.52

• Total Profit: -$541.71

• Profit Margin: -1.26%

---

5. Monthly Trend Analysis

Across the 47 months recorded (2023-02 through 2026-12), sales and profitability showed the following key observations:

• Highest Revenue & Profit Month: March 2026 recorded the highest single-month sales ($20,351.68) and highest monthly profit ($7,766.57).

• Lowest Revenue Month: February 2023 recorded the lowest sales ($239.97) with a profit of $86.39 (note: data collection began mid-month on February 14, 2023). The lowest full-month sales occurred in February 2024 ($538.92 sales, $80.84 profit).

• Months with Negative Profit:

• October 2025: Sales of $3,221.09 resulted in a profit of -$531.14.

• April 2026: Sales of $8,496.32 resulted in a profit of -$2,910.62 (the largest profit deficit in the dataset).

• General Profitability: Out of 47 reporting months, 45 generated positive profit, while 2 generated negative profit.

---

6. Important Business Findings

• Subcategory Divergence:

• Copiers is the most profitable subcategory in total dollars ($19,327.24) and achieves the highest margin (38.85%), despite ranking third in sales volume.

• Phones generates the highest sales volume ($98,773.11, representing ~39% of total technology sales) but produces a comparatively low margin of 9.26%.

• Machines is net negative overall, posting a total profit of -$541.71 (-1.26% margin) on $43,130.52 in sales.

• Profit Volatility in Specific Months:

• April 2026 experienced a sharp drop to -$2,910.62 in profit despite solid revenue ($8,496.32).

• October 2025 also incurred a negative profit (-$531.14) on revenue of $3,221.09.

• The dataset does not provide order-level line items, product costs, or discount rates for these specific months to indicate the exact operational driver of these deficits.

---

7. Actionable Business Recommendations

1. Investigate the Machines Subcategory:

• *Finding:* Machines generated -$541.71 profit across $43,130.52 in sales.

• *Action:* Conduct a line-item audit into individual orders within Machines to determine whether specific product models, discounting levels, shipping fees, or vendor costs are causing the negative return.

2. Examine Negative-Profit Months (April 2026 and October 2025):

• *Finding:* Significant profit deficits occurred in April 2026 (-$2,910.62) and October 2025 (-$531.14).

• *Action:* Review the specific order transactions, discount percentages, and product mix sold during these two months to isolate the root cause of the losses.

3. Review Phone Margin Structures:

• *Finding:* Phones represent the largest revenue contributor ($98,773.11) but deliver a lower profit margin (9.26%) relative to Accessories (26.97%) and Copiers (38.85%).

• *Action:* Analyze pricing, cost of goods, and discount distribution on Phone products to evaluate whether margins can be optimized without reducing overall sales volume.

4. Evaluate Capital Allocation Toward High-Margin Lines:

• *Finding:* Copiers (38.85% margin) and Accessories (26.97% margin) deliver the strongest profit returns relative to revenue.

• *Action:* Assess inventory allocation and sales focus in the West region to support sustained demand for these higher-margin subcategories.
